### EASY TO CLEAN

Superiorly non-porous surfaces are easy to clean due to their resistance qualities and flawless finish.

### SCRATCH RESISTANT

Made to endure and sustain, the surfaces are scratch resistant, resisting deep scratches and more.

Prevents Bacterial Growth

Dimensional Stability

Fire Resistant

Heat Resistant

Ecological

## TECHNICAL FEATURES

STAIN RESISTANT

## APPLICATION AREAS

Residence

Offices

Shops

Hotels

Public Places

Airports

Malls

## SLAB HANDLING

Tools suggested for handling

Reinforced trolley

Parallel & transverse guides

Single & Double suction cup

## HANDLING INSTRUCTIONS

We recommend carrying out the handling job of the slabs with four handlers at the same time.

Ensure proper suction with a vacuum between the device and the slab and use a single device/suction cup for a maximum length of up to 150cms.

To lift the slabs use sucker cups after cleaning the slab and cups with a damp sponge. Make sure the device also has suckers that run along with the guides and adhere to the slab.

To lift the slab use guides from the long sides of the slab and lift/hang it vertically to the handles of the trolley frame. Use appropriate size reinforced trolley for various sizes of slabs.

## SLAB LAYING

Tools suggested for Laying

3mm & 10mm trowel

Rubber trowel & Spacers

Device for plate's pulling over and Leveling wedges & clips

## SLAB LAYING INSTRUCTIONS

Check the laying substrate. Make sure it is clean, mature, and homogeneous with no cracks.

Apply adhesive onto the back of the slab with a 3mm trowel in one direction only.

Apply adhesive onto the floor substrate at the same time while applying on the slab with a 15mm U-notch or 19mm V-notch trowel in the same direction as the slabs.

Position the slab on the adhesive bed with a sucker frame with adjustment of a minimum of 3mm joint.

Tap the slab from the center to the edges with a rubber trowel to expel air. Make sure air is expelled and there is no bubble between the slab and the substrate.

Complete the laying of the slab with a suitable sealant while keeping a 3mm joint through spacers. The special device of pulling over the slabs can be used for easy laying and spacing.

Level the wedges at each linear meter of the slab.
